Ostec Group
5/2, Moldavskaya str.
Moscow, Russia, 121467

Dear Sirs,

The vibration isolation system I have purchased from your company strongly increased performance of the AFM instruments. In my laboratory we are imaging biomolecules, DNA and protein-DNA complexes. Accurate AFM measurements of these small and gentle molecules require vibration isolation of the AFM machine from the ambient environment. With the vibrational isolation system from Ostec Group, we were able to acquire high quality imagers of the molecules even during the day, when the noise pollution is very strong.

In addition I am very happy about the service provided by the technical team. Any questions I had about ordering, purchasing and technical characteristics of the system were answered very fast and I was always happy with the answers.

I want to thank Ostec Group for their efforts to provide outstanding service and for a great vibration isolation system that helps me a lot!

Sincerely,

Prof. Alexander Kotlyar
